Complete Private Secure Datacenter in the Cloud hosted by Experis Technology Group

Experis private clouds offer CPU power, Storage Capacity and Backup retention, with the security, control and performance of the dedicated environment you are accustomed to.

With a managed private cloud by Experis, we take care of the infrastructure and management, giving you the cloud expertise you need so you can focus on your core business.

Our private cloud is extremely customizable based on your requirements today and can grow with you as your requirements change.

To the right, an example of a single-tenant hosted private cloud, designed with server, storage, backup and networking hardware from HPE that's proactively managed 24x7x365 by our HPE, Microsoft, VMware, and Cisco certified engineers.

Why Dedicated Private Hosting at Experis:

- Dedicated Hosting is the most reliable and secure option. You are not sharing servers or Storage with anyone else.
- Experis provides complete turnkey certified systems.
- You have complete control over your environment. Know where your data is!
- You may incorporate your own Hardware and Software into the environment.
- The systems are located in an SSAE16 certified, secure, never-go-down datacenter.
- The Experis Datacenter has redundant, high speed, multicarrier networks to maximize speed and availability
- Network performance to Experis Data Center to the internet <2.6ms.
- Emergency workstations available for DR events and testing.
- Dedicated cross connects to other providers are available.

Your environment...

SECURED AND MANAGED IN OUR HOUSE

For \$8,750* per month we will provide:

- Three High Performance HPE physical servers, each with 14 cores and 192GB Memory. Able to support 150 vCPU's
- VMware Enterprise and Microsoft Datacenter Server software
- 30TB Usable High Performance 3PAR storage
- 30TB of SATA Storage with Veeam for Backup
- Dedicated 100Mb/s VPN Connection using Cisco ASA firewall (30TB of data transfer per month)
- This entire system will be hosted at the Experis Data Center located in Middletown, VA.

***Above is just an example of a complete datacenter in the cloud. Let us customize an environment for you. Please email info@experistg.com or call 240-223-0607 x12 for more information**
